

Knit Blockers

Introducing Knit Blockers™ by Knitter's Pride!

Knit Blockers™ are an innovative solution that allow users to more easily and more quickly block their projects.

Knit Blockers™ were developed by Nancy's Knit Knacks (NKK) of USA, a business outfit renowned for its creative products, based on a design and recommendation of a very creative knitter. NKK then sought a partner who could produce these products at a low cost and distribute them Worldwide. Knitter's Pride was the partner that NKK felt provided the best solution.

So the evolution of this great new product started by a knitter who had taken the time to make prototypes and who knew deep in her heart that this product was one which knitters Worldwide would enjoy using. When we first heard of it and had a chance to test the prototypes, we agreed. This product was a winner!

It substantially reduces the number of pins that a user needs to use to block a project. Plus it allows the user to apply a more consistent tension while blocking a wide area. It saves time and provides a better, more consistent solution than using pins alone.

Knit Blockers™ also have the ability to serve as an anchor for attaching string to run within the stitch ends along the perimeter of the project. You may also use Knit Blockers with blocking wires. These neat Knit Blockers do so many different tasks and we are sure that knitters will discover many more methods for using them.

We have added holes on both ends of each Knit Blocker which can serve as an anchor point when the user attaches string to these holes. Strings of various lengths can be used

A Knit Blockers™ set consists of 20 units in a nice plastic storage case: twelve 8 pin Blockers and eight 4 pin blockers. Some projects may require more Blockers but the user can use string to extend the length or use individual pins in conjunction with the Knit Blockers™. Of course, a knitter can buy a second set of blockers as well.

Knitter's Pride and Nancy's Knit Knacks have carefully engineered this product to provide a neat NEW solution for all knitters when blocking.

Product Configuration:

Large Blockers - 12 per set, 8 pins (stainless steel) Approx. 3" long
Small Blockers - 8 per set, 4 pins (stainless steel) Approx. 1.5" long
Height: total height is 1.75" of which the exposed pin length is 3/4"

Knit Blockers™ - This will change the way that Knitters will block their projects now and forever!

Knit Blockers™ come packaged in a neat plastic box

The box contains 12 large 8 pin units and 8 small 4 pin units.

The box has separator ridges to keep the Knit Blockers™ in place. The bottom of the box is lined with foam rubber to protect the pins.

Knitters may like the Knit Blockers™ so much that they could want 2 sets, especially for larger projects.
